

ChipIn — DESIGN.md

Version: 1.0 — locked brand foundation, working design system **Owner:** Lanardo "Nardo" Gibson — First Glance Bahamas / Traceline Bahamas Ltd. **Parent document:** ChipIn Project Master Document v1.1 (Section 6 + Next Deliverable 6) **Status:** Brand identity **LOCKED**. Component and flow specs **working draft** — refine during Phase 1A build.

1. Brand Foundation

1.1 The idea in one line

The gold dot over the *i* is a coin — the chip you drop in.

Every visual decision serves that single move. The wordmark is quiet, geometric, and confident so the one gesture — the coin — carries the meaning. Nothing else in the identity competes with it.

1.2 Naming and story

- **Name:** ChipIn — always camel case, one word. Never "Chip In," "CHIPIN," or "Chipin."
- **Meaning:** "Chippin' in" is what Bahamians already say when everybody puts something toward the cookout, the funeral, the hospital bill. The brand formalizes the phrase the same way the product formalizes the behavior.
- **Cultural positioning:** Bahamian pride lives in the **color** (flag aquamarine + gold), never in clichéd iconography. No conch shells, no palm trees, no flags, no hands-cradling-people. The restraint *is* the sophistication.

1.3 Tone of voice

Warm, communal, direct, trustworthy. Neighborly — never institutional, never charity-brochure.

Say	Don't say
"Chip in for Grammy's surgery"	"Donate to this campaign"
"Marked received by the host"	"Verified" / "Confirmed by ChipIn"
"This fundraiser is paused while we look into a report"	"This campaign has been flagged for review"

Say	Don't say
"You're all set — the host can see your report"	"Transaction submitted successfully"

Plain language is a trust control, not a style preference. If a status label needs a tooltip to be understood, rewrite the label.

2. Logo System

2.1 Variants (all final, all vector)

File	Use
<code>chipin-logo.svg / .png</code>	Primary wordmark — light backgrounds
<code>chipin-logo-reversed.svg / .png</code>	Dark backgrounds (paper letters, bright-aqua "In")
<code>chipin-logo-mono-ink.svg</code>	Single-color contexts: print, stamps, engraving, sponsor/legal docs
<code>chipin-logo-mono-paper.svg</code>	Single-color on dark
<code>chipin-icon.svg</code>	App icon / small-size mark — aquamarine tile, paper <i>i</i> , gold coin
<code>chipin-icon-dark.svg</code>	Ink-tile icon variant
<code>favicon.ico + chipin-icon-512/192/32.png</code>	Browser + PWA manifest sizes

All type is converted to outlines — **zero font dependency** in logo files. Source of truth is the SVG set; PNGs are exports, never masters.

2.2 Construction notes

- Typeface base: **Bricolage Grotesque** wght 700, −0.03 em tracking, camel-case two-tone (**Chip** ink / **In** aquamarine).
- The coin is a perfect circle centered on the *i* stem, sitting just above x-height where a tittle naturally lives.

- **Mono exception:** in single-color variants the coin is lifted slightly higher and trimmed ~5% smaller so it separates cleanly from the stem without color contrast. This is intentional — do not "fix" mono to match the color geometry.

2.3 Usage rules

- **Clear space:** keep a margin equal to the coin's diameter on all sides of the wordmark; half the tile width around the icon.
- **Minimum sizes:** wordmark ≥ 96 px wide on screen / 25 mm in print. Below that, use the icon. Icon holds to 16 px.
- **Backgrounds:** primary on Warm Paper or white; reversed on Ink or Aquamarine. Never place the wordmark on photography without a solid underlay panel.
- **Never:** stretch, rotate, add shadows/gradients/outlines, recolor outside the approved palette, separate the coin from the wordmark as a floating decoration, or pair the wordmark with any secondary icon.
- The **coin-over-*i*** (icon) is the only sanctioned standalone mark.

2.4 Ownership

Artwork © Traceline Bahamas Ltd. Register "ChipIn" wordmark + icon as trademarks in The Bahamas before public launch marketing (open action — see master doc §12.12 policies item).

3. Color

3.1 Core palette (locked)

Token	Hex	Role
--ink	#0C1B1A	Primary text, "Chip," dark surfaces
--aqua	#05A39B	Brand color — "In," primary actions, links. Flag aquamarine.
--gold	#F2B01E	The coin. Accent only — progress fills, key highlights. Never body text.
--aqua-bright	#14BEB2	Aqua on dark surfaces (contrast-corrected)

Token	Hex	Role
--paper	#FBF7EE	Default page background — warm, never clinical white

3.2 Extended system palette

Token	Hex	Role
--paper-2	#F1E9D9	Cards, wells, alternate rows
--line	#E2D8C4	Borders, dividers
--ink-60	#5A6B69	Secondary text on paper
--ink-40	#8C9997	Placeholder / disabled text
--gold-deep	#D9971A	Gold hover / pressed
--aqua-deep	#047C76	Aqua hover / pressed
--aqua-tint	#E3F4F2	Aqua wash backgrounds (info panels, selected states)
--gold-tint	#FBEECD	Gold wash backgrounds (pending states)

3.3 Status colors

Statuses must be distinguishable by **text + icon**, **never color alone** (master doc §6). Color reinforces; it never carries.

Status	Token	Hex	Icon direction
Marked received	--status-received	#1E7A4A	check-circle
Pending / reported	--status-pending	#B07A10	clock
Clarification requested	--status-clarify	#8A5A00	chat-question
Not found / disputed	--status-dispute	#B3382C	alert-triangle

Status	Token	Hex	Icon direction
Paused	<code>--status-paused</code>	#5A6B69	pause-circle
Expired / closed	<code>--status-closed</code>	#8C9997	archive
Fulfilled / goal met	<code>--status-fulfilled</code>	#05A39B	flag-check

3.4 Accessibility pairs (WCAG 2.1 AA)

- Body text: `--ink` on `--paper` — passes AAA.
 - `--aqua` on `--paper` passes AA for **large text and UI components only**; body-size aqua text uses `--aqua-deep`.
 - On `--ink` surfaces use `--paper` text and `--aqua-bright` accents.
 - `--gold` never carries text at any size — decorative and data-fill only.
 - Every status color above was chosen to pass AA at label size on `--paper`; re-verify any new pairing with a contrast checker before shipping.
-

4. Typography

4.1 Faces

Role	Face	Weights	Notes
Display / headings / numbers	Bricolage Grotesque	600, 700	The brand voice. Also used for BSD \$ amounts and progress figures — its slightly warm geometry keeps money human.
Body / UI	Public Sans	400, 500, 600	Clear, neutral, excellent at small sizes on cheap Android screens.

Role	Face	Weights	Notes
Code-like (references, transfer codes)	Space Grotesk	500	Transfer references, campaign codes, audit timestamps. Tabular, unambiguous glyphs.

Self-host via Fontsource; subset latin. `font-display: swap`. Total font budget ≤ 120 KB woff2.

4.2 Scale (1.250 ratio, rem-based)

Token	Size	Use
<code>--text-xs</code>	0.75rem	Timestamps, metadata
<code>--text-sm</code>	0.875rem	Labels, captions, table cells
<code>--text-base</code>	1rem (16px)	Body — never smaller for paragraphs
<code>--text-lg</code>	1.25rem	Card titles, section leads
<code>--text-xl</code>	1.563rem	Page titles (mobile)
<code>--text-2xl</code>	1.953rem	Page titles (desktop), campaign headline
<code>--text-3xl</code>	2.441rem	Hero, big totals

Line-height: 1.5 body, 1.15 display. Campaign stories: max-width 65ch.

5. Spacing, Layout, Radius, Elevation

5.1 Space scale — never freelance values

`--space-1` 4px · `--space-2` 8px · `--space-3` 12px · `--space-4` 16px · `--space-5` 24px · `--space-6` 32px · `--space-7` 48px · `--space-8` 64px · `--space-9` 96px

5.2 Layout

- Mobile-first; single column to 640 px. Content max-width 720 px (campaign pages) / 1080 px (dashboard).
- Page gutter: `--space-4` mobile, `--space-6` up.
- **Touch targets ≥ 48 px** in both dimensions — hard rule, from the master doc.

5.3 Radius

`--radius-sm` 6px (inputs, chips) · `--radius-md` 12px (cards, buttons) · `--radius-lg` 20px (modals, hero panels) · `--radius-full` (avatars, the coin)

5.4 Elevation

Flat by default — borders (`--line`) do the separating work. Exactly two shadows exist:

- `--shadow-raise: 0 2px 8px rgba(12,27,26,.08)` — cards on hover, dropdowns
- `--shadow-modal: 0 12px 40px rgba(12,27,26,.18)` — dialogs only

Banned: glassmorphism, gradient buttons, parallax, decorative blur. (House rule, non-negotiable.)

6. Design Tokens — drop-in `app.css` block

```
:root {  
  
  /* color — core */  
  
  --ink:#0C1B1A; --aqua:#05A39B; --gold:#F2B01E;  
  
  --aqua-bright:#14BEB2; --paper:#FBF7EE;  
  
  /* color — system */  
  
  --paper-2:#F1E9D9; --line:#E2D8C4;  
  
  --ink-60:#5A6B69; --ink-40:#8C9997;  
  
  --gold-deep:#D9971A; --aqua-deep:#047C76;  
  
  --aqua-tint:#E3F4F2; --gold-tint:#FBEECD;
```

```
/* color — status */

--status-received:#1E7A4A; --status-pending:#B07A10;

--status-clarify:#8A5A00; --status-dispute:#B3382C;

--status-paused:#5A6B69; --status-closed:#8C9997;

--status-fulfilled:#05A39B;

/* type */

--font-display:"Bricolage Grotesque",system-ui,sans-serif;

--font-body:"Public Sans",system-ui,sans-serif;

--font-mono:"Space Grotesk",ui-monospace,monospace;

--text-xs:.75rem; --text-sm:.875rem; --text-base:1rem;

--text-lg:1.25rem; --text-xl:1.563rem; --text-2xl:1.953rem; --text-3xl:2.441rem;

/* space */

--space-1:4px; --space-2:8px; --space-3:12px; --space-4:16px;

--space-5:24px; --space-6:32px; --space-7:48px; --space-8:64px; --space-9:96px;

/* radius */

--radius-sm:6px; --radius-md:12px; --radius-lg:20px; --radius-full:999px;

/* elevation */

--shadow-raise:0 2px 8px rgba(12,27,26,.08);

--shadow-modal:0 12px 40px rgba(12,27,26,.18);

/* motion */

--ease:cubic-bezier(.2,.7,.3,1); --dur-fast:120ms; --dur-base:200ms; --dur-slow:320ms;

}
```

Component styles live in each Svelte component's scoped `<style>` block and reference tokens only. Global CSS contains: reset, tokens, base typography, and ≤ 10 hand-picked utilities (`.visually-hidden`, `.stack`, `.cluster`, etc.). No utility framework.

7. Signature Components

These five components carry the product's personality. Everything else is quiet.

7.1 The Progress Coin-Bar

The campaign progress bar is the brand moment. Track in `--paper-2`; fill in `--gold`; the leading edge of the fill is a **gold circle — the coin itself, mid-drop**. Label reads: **"\$X marked received by the host of \$Y goal"** — the exact attestation language from the master doc, never shortened to "raised."

7.2 Status Chip

Pill, `--radius-full`, icon + text always. Tint background, dark status-color text. Chips are the visible spine of the trust system — same component from campaign card to audit log so users learn it once.

7.3 Campaign Card

Photo (4:3, solid underlay), title (`--text-lg` display), host line with review labels, coin-bar, status chip. Border `--line`, radius `--radius-md`, raise shadow on hover only. No badges implying ChipIn guarantees anything — labels use the master doc's narrow dated wording.

7.4 Transfer Reference Panel

The moment a donor gets their reference/QR. Reference set in `--font-mono` at `--text-xl`, letter-spaced, in a `--gold-tint` well with copy button and QR. Beneath it, the per-bank instruction accordion (from Stage 0 findings). This screen must survive a screenshot — it will be forwarded on WhatsApp constantly, so it carries the wordmark and the campaign short-link.

7.5 Attestation Row (host dashboard)

One reported transfer = one row: donor-reported amount, date, reference, evidence indicator → host action cluster (**Mark received (amount) · Not found · Ask for clarification**). Every action requires the amount field; the row's whole history expands inline (append-only, compensating events visible). No bulk "confirm all" — per master doc §3.3.

8. Motion

- CSS-only. Durations/easing from tokens. Nothing exceeds `--dur-slow`.
 - Sanctioned moments: coin drop-in on page load (the tittle settles, 320 ms, once), progress-bar fill on first view, chip state cross-fade, accordion expand.
 - Everything honors `prefers-reduced-motion: reduce` → transitions to opacity-only or none.
 - No looping animation anywhere. This is a platform people visit while grieving; the interface stays calm.
-

9. Accessibility Targets & Test Matrix

Target: WCAG 2.1 AA across the pilot surface.

Check	Gate
Contrast (per §3.4 pairs)	Every new color pairing verified before merge
Touch targets ≥ 48 px	Component review
Status = text + icon, never color alone	Component review
Full keyboard path: pledge → report → attest	Pre-pilot manual test
Screen reader labels on all status chips, coin-bar (announces attested total), reference panel	Pre-pilot manual test
Forms: visible labels, error text linked via <code>aria-describedby</code>	Component review
<code>prefers-reduced-motion</code> respected	Component review
No-JS fallback: campaign pages render content + bank details server-side; pledge flow degrades to instructions + contact path	Pre-pilot manual test
Test devices: low-end Android (Chrome), iPhone Safari, desktop Chrome/Firefox; throttled 3G pass on campaign page	Pre-pilot manual test

Performance budget: campaign page $\leq$ 200 KB transferred (excl. campaign photo), LCP $<$ 2.5 s on throttled 3G. Lightweight pages are an equity feature — cheap phones and patchy data are the real Bahamian mobile context.

10. Social & Sharing Surfaces

- **OG image:** auto-generated per campaign — Warm Paper ground, campaign title in display face, coin-bar snapshot, wordmark bottom-right. 1200×630. Regenerated when attested total changes materially.
 - **WhatsApp preview** is the primary distribution surface — test every template there first, not on Twitter/FB.
 - **QR codes:** ink on paper, coin-over-*i* icon centered at $\leq$ 20% area, error correction H. Printable flyer export (A5) ships in Phase 1A — hosts *will* print these for church notice boards; design for a cheap black-and-white printer (mono logo variant exists for exactly this).
 - Campaign short-links: chipin242.com/c/{code} — code in Space Grotesk on all printed material.
-

11. File Manifest

chipin-brand/

- |— DESIGN.md ← this document
- |— chipin-logo.svg / .png ← primary wordmark
- |— chipin-logo-reversed.svg / .png
- |— chipin-logo-mono-ink.svg ← single-color (print/stamps/legal)
- |— chipin-logo-mono-paper.svg
- |— chipin-icon.svg ← standalone mark (aqua tile)
- |— chipin-icon-dark.svg
- |— chipin-icon-512/192/32.png ← PWA manifest set
- |— favicon.ico ← 16/32/48 multi-size

12. Drop-in replacement for Master Document §6

Replace the current "Brand and Experience" section body with the following; it resolves the "coin" hedge and binds the master doc to this DESIGN.md.

Identity

- **Name:** ChipIn — camel case, one word.
- **Wordmark:** Dark "Chip" ([#0C1B1A](#)), aquamarine "In" ([#05A39B](#)), and a gold circular tittle ([#F2B01E](#)) over the *i*. **The tittle is the coin — the chip you drop in.** This motif is approved and central to the brand story.
- **Tone:** Warm, communal, direct, trustworthy; neighborly rather than institutional.
- **Logo variants (complete, vector, locked):** primary, reversed, monochrome ink, monochrome paper, standalone icon (light + dark tiles), favicon/PWA set. Clear-space, minimum-size, contrast, and usage rules are defined in [DESIGN.md](#). Artwork © Traceline Bahamas Ltd.; trademark registration pending.

Design principles

- Mobile-first for WhatsApp-shared links; performance budget for slow connections.
 - 48 px minimum touch targets.
 - Plain language; visible status labels distinguishable by text and icon, never color alone.
 - Optimized WhatsApp/social previews; printable flyer exports use the monochrome mark.
 - Svelte scoped CSS + design tokens; no utility framework.
 - Full color, typography, spacing, component, motion, and accessibility specifications: **see [DESIGN.md v1.0](#)** (authoritative).
